

# Patient-Centered Medical Home

*Putting the focus on the patient*

A Patient-Centered Medical Home (PCMH) strengthens the doctor-patient relationship and improves health care quality by helping primary care doctors and their health care teams more effectively manage their patients' care. To accomplish this, PCMH practices use such features as e-prescribing, chronic disease management, 24-hour access to a clinical decision-maker and development of patient registries to track and monitor care. Health care teams also work closely with patients to help them set individualized health goals and encourage them to take a more active role in their own health management.

West Michigan Physicians Network and Physicians' Organization of Western Michigan provide support to physician practices, including those working to become a Patient-Centered Medical Home.

**Congratulations to the physician offices listed below who have been selected as a Patient-Centered Medical Home designated practice by Blue Cross Blue Shield of Michigan for 2011-2012**
